TOUGHER SOFTER

## CHARTS

Season Last 4

### VOLUME VS EFFICIENCY

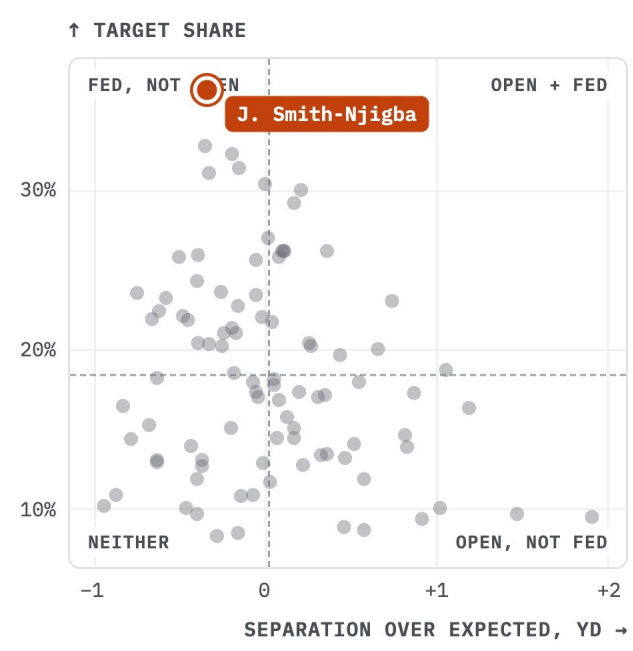

94 WRs with 2.5+ targets per team game. Dashed lines mark the WR average.

**Fed + efficient.** 1st in target share, 5th in EPA per target.

### GETTING OPEN

Separation when the ball arrives, minus what his target depth predicts.

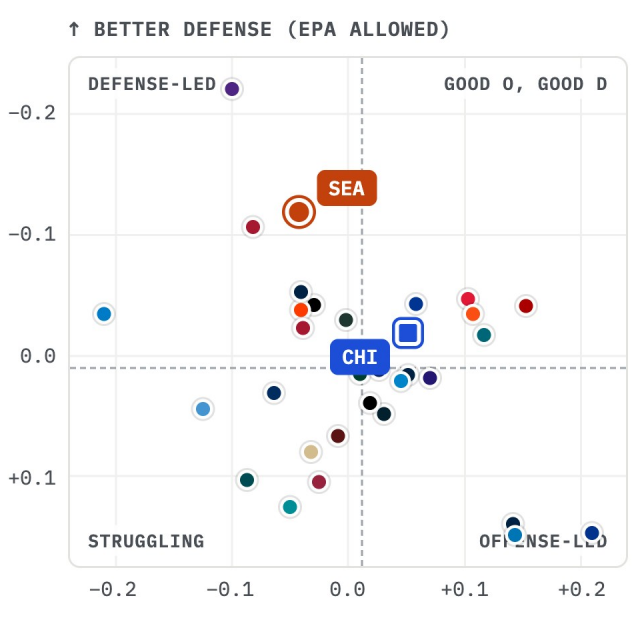

**Fed, not open.** 1st in target share, 68th of 93 in separation over expected.

### WEEK 8 MATCHUP

Team EPA per play, offense against defense. Not schedule-adjusted.

SEA (his team) CHI (opponent)

**CHI defense:** 14th in EPA per play allowed. SEA allows the 2nd fewest.

## VOLUME VS EFFICIENCY

Near-identical volume. Metcalf does more with each target.

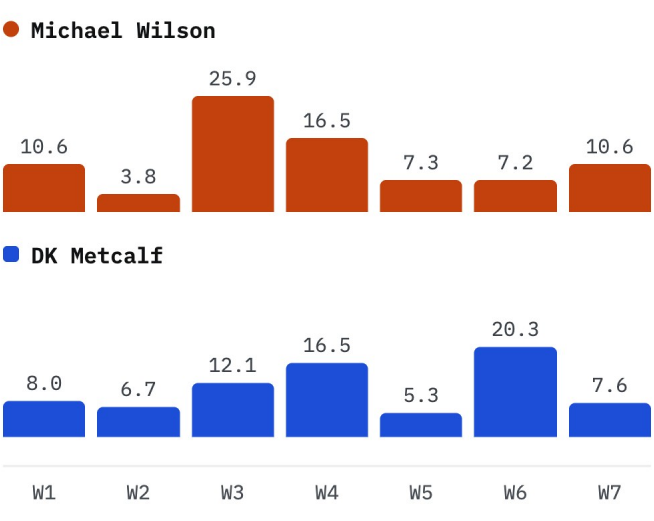

## GETTING OPEN

Both are fed without winning much separation.

## WEEKLY PPR

Weeks 1 to 7

Implied team total = (game total ± spread) / 2 from the betting line in nflverse schedules. Edges count only; Statline does not make the call.

NYJ WR NEW YORK JETS

# OMAR COOPER JR.

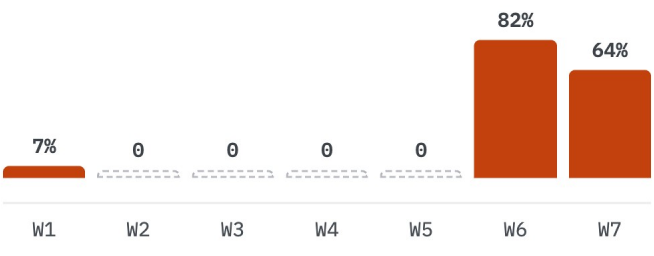

THROUGH WEEK 7 Week 8: 1 of 14 games final

**Small sample**
13 targets in 3 games. The line is 2.5 per team game (17.5 so far). He is plotted hollow and left out of the averages.

| PPR / GAME | LAST 2 GAMES | EPA / TARGET |
|---|---|---|
| 16.3 | 22.4 | +1.44 |
| 3 games | PPR / game | 13 targets |

## ROLE TREND

Offensive snap share

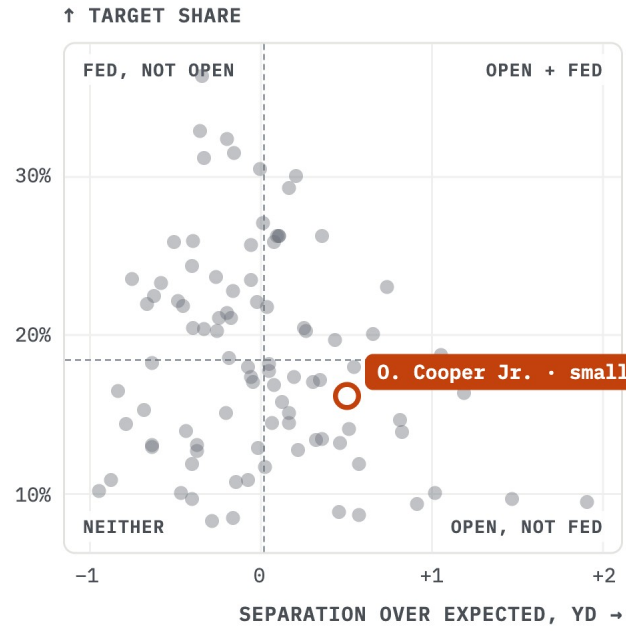

**W1** 1 tgt · 4.0 **W6** 7 tgt · 22.3 **W7** 5 tgt · 22.5

No offensive snaps recorded in Weeks 2 to 5.

## GETTING OPEN

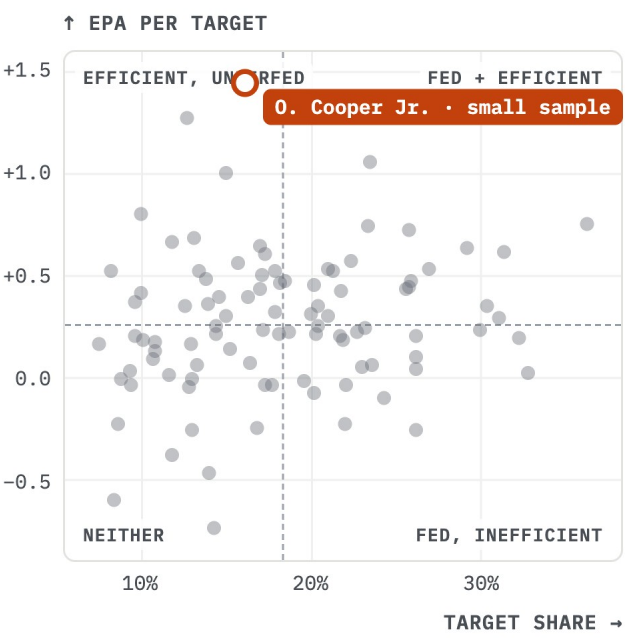

Hollow dot: not enough targets to qualify yet.

**Open, not fed.** +0.51 yd of separation over expected on a 16.1% target share.

## VOLUME VS EFFICIENCY

Highest EPA per target on the chart, from 13 targets.

WEEK 8 MATCHUP

HOW THIS CHART IS BUILT

# GETTING OPEN

## Across: separation over expected

Average separation when the ball arrives (Next Gen Stats), minus what his average target depth predicts. Deep targets come with less separation, so the raw number mostly measures route depth.

```
sep_oe = separation
  − (4.06 − 0.109 × aDOT)
```

Fit across 129 qualified WRs and TEs this season. Smith-Njigba: 2.55 yd at a 10.7 aDOT, 2.89 expected, so −0.34.

## Up: target share

His targets divided by his team's targets in the games he played. Summed first, then divided, never an average of weekly shares.

**PLOTTED**
2.5+ targets per team game. 94 WRs this week.

**HOLLOW**
Below the line. Shown when selected, left out of averages and the fit.

FRESHNESS

**Through Week 7**

Week 8 has 1 of 14 games final. A week publishes only once every game is final, so numbers never mix complete and partial weeks.

## Where the numbers come from

| | |
|---|---|
| SOURCE | **nflverse + NGS** Weekly player stats, play-by-play, Next Gen Stats |
| ↓ | |
| BRONZE | **DuckLake** Raw files landed as-is, one snapshot per run |
| ↓ | |
| SILVER | **dbt staging** Typed, deduped, keyed on gsis_id and team_abbr |
| ↓ | |
| GOLD | **fct_player_game** One row per player per game |
| ↓ | |
| MART | **mart_player_week** Additive measures only: targets, team targets, air yards, EPA sums |
| ↓ | |
